

Tom Thing

He has a number of good  
qualities which would make him  
a good prospect for the program.  
Again I would recommend  
ongoing counseling mentioned by

~~Yes~~

The S.A.S. recommendation  
says it for me. Ordinarily -  
I'd question the age - and  
brain situation; but  
in light of SAS. OK -  
I'll go w/a yes!

Bede

## TOM THING

I see some possibility in  
Tom from recommendations  
but also feel qualified  
YES as vote.

Useful ongoing  
counseling + brain test  
as recommended in psych  
report.

His essay did not say  
much to me of realistic  
self.

Still young + needs more  
experiences to grow.

QUALIFIED YES,

5/19/98

Tom's essay doesn't say much  
directly - indirectly it shows  
his immaturity.

I too notice that the faculty  
hasn't responded yet to the  
brain scan suggestion.

Otherwise he seems to be a  
good prospect for his age.

## Tony Thing

All things considered,  
I believe it would serve  
Tony better to take some  
time out.

at this time I vote  
"no" — after a  
couple of years — reply.
